

Aliaksandr Razhachkin

Senior Frontend Engineer · React · Vue · TypeScript

Wrocław, Poland · bubonik.san1993@gmail.com

linkedin.com/in/sanyara · github.com/agentra · curite.store

SUMMARY

Senior Frontend Engineer with 6+ years of commercial experience building scalable web applications for clients in Europe and the US. Strong in React and TypeScript, currently working with Vue.js at Toshiba Global Commerce Solutions. Built two production products from scratch — a SaaS platform for dance studios and a multi-vendor marketplace — owning architecture (Feature-Sliced Design), typed API layers, testing, SEO and CI/CD. Comfortable taking features end-to-end and doing root cause analysis in large, long-lived codebases.

SKILLS

Frontend: TypeScript, JavaScript (ES6+), React 19, Vue.js, Next.js, HTML5, CSS3 / Sass

State & data: TanStack Query, TanStack Router, TanStack Table, Zustand, Redux Toolkit, React Hook Form, Zod

UI: Tailwind CSS, shadcn/ui (Radix), Material UI, Storybook, dnd-kit

Engineering: Feature-Sliced Design, typed API layers, performance optimization, SEO, accessibility, i18n

Testing: Vitest, Jest, React Testing Library, Playwright

Tooling & DevOps: Vite, Webpack, Docker, nginx, GitHub Actions, Azure DevOps, Git, Biome

Backend: Node.js, NestJS, Express, REST, GraphQL

EXPERIENCE

Senior Software Engineer · Toshiba Global Commerce Solutions

Jan 2026 – Present

Wrocław · Hybrid · B2B

Frontend engineering for retail commerce software.

Stack: Vue.js, JavaScript

- Develop new features end-to-end in a large-scale, long-lived frontend codebase
- Root cause analysis (RCA) of production issues: reproducing, debugging and fixing defects
- Troubleshoot performance and improve the reliability of existing functionality
- Work with international teams on requirements, code reviews, testing and delivery

Co-founder & Frontend Lead · Curite.store

Mar 2025 – Present

Own product · Remote · built together with my brother

Bilingual (PL/EN) multi-vendor marketplace for handmade goods from independent Polish makers — live at curite.store.

Stack: React 19 (React Compiler), TypeScript, Vite, TanStack Router & Query, Zustand, Zod, Tailwind CSS 4, shadcn/ui, i18next, Stripe, Vitest, Playwright, Docker, Azure DevOps

- Architected the storefront SPA on Feature-Sliced Design: home, catalogue, category, product and maker pages, cart and checkout
- Built cart and checkout with optimistic updates, per-vendor order grouping, InPost parcel-locker selection, Stripe Checkout and Cloudflare Turnstile
- Built the SEO layer: route-level meta tags, JSON-LD structured data, hreflang, localized URLs, sitemap and prerendering for search and AI crawlers
- Implemented GA4 e-commerce tracking with Consent Mode v2 and Core Web Vitals real-user monitoring; shipped product reviews with email OTP, photo uploads and feature flags
- Set up quality gates (180+ Vitest test files, Playwright smoke and axe accessibility tests) and an Azure Pipelines CI/CD with Docker images deployed to UAT and production
- Rewrote the first version of the app onto a modern stack (React 19, TanStack Router, Tailwind 4, Zod 4)

Frontend Developer • [dancepro.app](#)

Jan 2025 – Jan 2026

US client • Remote • B2B contract

SaaS platform that dance studios use to run in-studio ballroom competitions.

Stack: React 19 (React Compiler), TypeScript, Vite, Feature-Sliced Design, TanStack Query & Table, Zustand, React Router 7, React Hook Form + Zod, Tailwind CSS 4, shadcn/ui, dnd-kit, GitHub Actions

- Built the frontend from scratch as the sole frontend developer and owned its Feature-Sliced Design architecture (25 feature slices, 17 page modules)
- Event and heat management: multi-step event wizard, heat generation, drag-and-drop heat reordering with optimistic updates and rollback, merge / move / swap tools
- Complex participant registration: multi-dance selection, partner assignment, level and age rules, autosave
- Typed API layer: 8 domain services with Zod-validated requests and responses, JWT with silent refresh, query-key factories, background data preloading
- Auth and onboarding (studio sign-up with email OTP, staff invites), payments and subscriptions UI (per-event checkout, yearly plan)
- Led platform upgrades: React 18 → 19 with React Compiler, Tailwind 3 → 4, ESLint/Prettier → Biome, AVIF images; set up CI/CD deploys

Frontend Developer • [Kellton Europe](#)

Jan 2024 – Oct 2024

Wrocław • Hybrid • client: PDF Solutions

Factory management system: metrics, statistics, schedules and dynamic tables.

Stack: React, TypeScript, Redux, Vitest, Material UI

- Extracted the factory management app into a standalone application and delivered a complete UI reskin
- Removed legacy code, improved test coverage, readability and performance
- Translated client requirements into product stories together with cross-functional teams; authored an internal article on frontend best practices

Software Engineer • [Godel Technologies Europe](#)

Aug 2022 – Jul 2023

Wrocław

Stack: React 18, TypeScript, React Context, rc-table, Jest

- Built an HR staffing portal that replaced Excel-based staff allocation and activity tracking
- Redesigned the Vacation Tracker portal with designers based on a UX analysis of its pain points; delivered performance optimizations

Frontend Developer • [Dashbouquet Development](#)

Mar 2021 – Apr 2022

Minsk

Stack: React, Redux-Saga, styled-components, Storybook, Formik, i18next

- Form builder for an emergency desktop app: reusable components, internationalization, charts and validation schemas
- Crypto exchange and betting-strategy products: Storybook component library, migrations to modern tooling, PDF / email reports, code reviews

Frontend Web Developer • [ChainArtSoft](#)

Mar 2020 – Mar 2021

Minsk

Stack: React, Gatsby, Redux, GraphQL, styled-components

- Car management system MVP: data tables, forms and validation, a document upload / edit widget, third-party integrations and refactoring

Earlier: Software Engineer / System Administrator, Molodechno Central District Hospital (Dec 2017 – Jan 2020)

EDUCATION & COURSES

Belarusian State University — B.Sc. in Engineering, Faculty of Radiophysics and Computer Technologies, 2011 – 2017

Rolling Scopes School — JavaScript / Frontend (2019) and Node.js (2022) courses; later mentored students

LANGUAGES

English — B2 (professional working) • Polish — A2 • Russian, Belarusian — native
